"Talking in the Dark" is an excellent teaser for what Izaddoost will be delivering on both the tape and his release later in 2017. From its sweeping opening synths that herald the foundation rattling beats and rapid melodic lead that quickly follow, VVV covers an infinitely complex array of sounds and vibes in the span of a few short minutes. With a lush, ambient breakdown that quickly jumps right back into the rhythms, both Izaddoost's prowess in building memorable rhythms and his nuanced, complex approach to production and mixing are clearly at the forefront. Look for the limited mixtape *Why El Paso Sky* to be released on March 10, 2017 on the Holodeck label, and more new work to follow later this year.
